

ATUL RAJ

Ranchi, Jharkhand

+91 9470359450 | rajatul8496@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

NIST University, Berhampur, Odisha

Bachelor of Technology in Computer Science and Engineering

2022 – 2026

CGPA: 8.5/10

EXPERIENCE

CSharpTek

Full Stack Developer Intern

Oct 2025 – Feb 2026

Remote

- Developed scalable **full-stack applications** using **Next.js** and **Node.js**, collaborating in a team environment and improving user interaction efficiency by **30%** through optimized UI and API design.
- Built and optimized **REST APIs** using **PostgreSQL** and **MongoDB**, reducing response time by **25%** and improving system reliability.
- Implemented **JWT-based authentication** and optimized UI responsiveness, while following clean code practices for maintainability and security.

Defence Research and Development Organisation (DRDO)

Research Intern

June 2025 – Aug 2025

New Delhi, India

- Researched **Quantum Computing & QML** (QFT, QPE, Grover's, Shor's) for cryptography and optimization.
- Simulated quantum circuits using **IBM Qiskit**, improving algorithm analysis efficiency by **20%**.

PROJECTS

JournEaze – AI-Powered Collaborative Travel Platform

[Live](#) | [GitHub](#)

Next.js, PostgreSQL, Prisma, Tailwind CSS, Groq AI, Mapbox

- Built a **real-time collaborative platform** enabling **10+ concurrent users** in real-time environments to edit itineraries simultaneously with **conflict resolution**.
- Integrated **AI-powered recommendations** using **Groq API**, reducing **manual planning effort** by **40%**.
- Designed a **scalable backend** with **PostgreSQL** and **Prisma**, improving **query performance** and reducing latency by **30%**.

SyncVerse – Real-Time Collaborative Media Platform

[Live](#) | [GitHub](#)

Next.js, Node.js, Socket.IO, WebRTC, PostgreSQL, Docker, AWS

- Designed and engineered a real-time media synchronization system using **WebSockets**, achieving sub-second latency across concurrent users by implementing server-authoritative state synchronization.
- Developed a **WebRTC-based peer-to-peer architecture**, reducing server bandwidth usage by **35%**.
- Deployed containerized applications using **Docker** on **AWS**, improving scalability and system reliability by **30%**.

PitchPulse – Cricket Management & Live Scoring Platform

[Live](#) | [GitHub](#)

Next.js, Fastify, PostgreSQL, Prisma, Socket.IO, Docker, Kubernetes

- Developed a **real-time scoring platform** handling live match data with **sub-second latency**.
- Implemented a **CQRS-based event-driven architecture**, improving system consistency and handling real-time event ordering challenges.
- Built **analytics modules** for **DLS** and **NRR**, enabling **data-driven insights** and decision-making.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C, HTML, CSS

Frontend: React.js, Next.js, Three.js, Tailwind CSS

Backend: Node.js, Express.js, NestJS (REST APIs, modular design)

Databases: MongoDB, MySQL, PostgreSQL

DevOps & Cloud: Docker, AWS, CI/CD (Jenkins), Kubernetes (Basics), Git (version control)

LEADERSHIP & ACHIEVEMENTS

- President, Club Innova** – Led 70 members; organized events with **1000+ attendees**.
- NCC Cadet (A, B & C Certificate Holder)** – Demonstrated leadership, discipline & teamwork.
- Cleared **NDA** written exam **3 times** (AIR 501 in NDA 147).
